

# Roll for Reward

A dice game in four rounds. Each round adds a new kind of reward. You rate every round, so we can compare how each kind of reward felt.

## TABLES OF 4–5 · KIT PER TABLE

- **Two six-sided dice** in different colours: the **main die** and the **modifier**.
- **One eight-sided die (d8)**. No d8? Roll a d6 and add 2.
- **About 15 duck tokens** (counters, coins or paper squares), and this sheet and a pen each.

## EVERY ROUND

Take turns clockwise: **5 turns each** in Rounds 1–2 and **6 turns each** in Rounds 3–4. The highest score at the table wins the round and gets a ★. Then, on your own, rate the round on page 2.

## THE FOUR ROUNDS

| Round                | Rules                                                                                         | The idea                               |
|----------------------|-----------------------------------------------------------------------------------------------|----------------------------------------|
| <b>1 · Fixed</b>     | Roll the main die and score what you roll.                                                    | Immediate, predictable reward          |
| <b>2 · Variety</b>   | Use the dice table below.                                                                     | Random, tiered and collectible rewards |
| <b>3 · Risk</b>      | Round 2 rules, plus the pot and the bank (below).                                             | Choice: risk against safety            |
| <b>4 · Spotlight</b> | Round 3 rules. Scores go on a class leaderboard, and the top score in the room is the winner. | Social comparison and recognition      |

## DICE TABLE · ROUNDS 2, 3 AND 4

| Main die      | What happens                                                                                                                                               |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b>      | <b>Tier up:</b> no points, but roll the d8 as your main die for the rest of the round.                                                                     |
| <b>2 or 4</b> | Score it.                                                                                                                                                  |
| <b>3 or 5</b> | Score it, then roll the modifier: <b>4–6 add it, 1–3 take it away</b> .                                                                                    |
| <b>6</b>      | <b>Take a duck.</b> No points now. Ducks score at the end of the round: <b>4 each, or 5 each if you have three or more</b> . Nothing can take a duck away. |
| <b>7 or 8</b> | d8 only: score it.                                                                                                                                         |

## POT AND BANK · ROUNDS 3 AND 4

Points you roll go into your **pot**. If your main die shows **1**, **you bust**: you lose the whole pot (you still tier up). On your turn you can **bank instead of rolling**: your pot moves into your bank, where it can't be lost. At the end: **bank + pot + ducks**.

On paper: write each roll's points in its turn box. Bank: write **B** and your banked total. Bust: write **X** and cross out every number since your last bank.

Rather not play? Be the table's scorekeeper: check the maths and note the moments people get excited.

## SCORES

| Round         | T1 | T2 | T3 | T4 | T5 | T6 | Ducks (no.) | Total | ★ | Fun 1–7 | Wanted another turn 1–7 |
|---------------|----|----|----|----|----|----|-------------|-------|---|---------|-------------------------|
| 1 · Fixed     |    |    |    |    |    |    | —           |       |   |         |                         |
| 2 · Variety   |    |    |    |    |    |    |             |       |   |         |                         |
| 3 · Risk      |    |    |    |    |    |    |             |       |   |         |                         |
| 4 · Spotlight |    |    |    |    |    |    |             |       |   |         |                         |

Fun: 1 = not at all, 7 = extremely. Wanted another turn: 1 = glad it stopped, 7 = I really wanted to keep going. Rate each round as soon as it ends, before you see anyone else's.

## AFTER ROUND 4

|                                                                                               |  |
|-----------------------------------------------------------------------------------------------|--|
| The best moment of the game was...                                                            |  |
| The reward I cared about most (points, ★, ducks, the leaderboard, winning, something else)... |  |
| In Rounds 3–4 I banked when my pot reached about... because...                                |  |
| Did the class leaderboard make Round 4 more fun, or less? Why?                                |  |

## EXIT TICKET

A reward system is fair when the player would still choose it if they knew
